BRACELETS MEASUREMENT GUIDE

Extra Small	Small	Medium	Large	Extra Large
11 - 13 cm	13 - 15 cm	15 - 17 cm	17 - 19 cm	19 - 22 cm

To measure the circumference of the wrist, simply use a tape measure by wrapping it snugly but not tightly around the wrist.

The measurement can also be taken with a normal string or ribbon: wrap the string around your wrist and mark the measurement by holding the junction point with your fingers. Then simply measure the length with a ruler.

Compare the measurement obtained with the table above and choose the correct size. The size to be selected is the wrist size, not the bracelet size.

For sizes larger than those shown in the table, simply indicate the closest value and when placing your order specify the correct size in the notes or contact us by e-mail.
